NISSAN Y62 PATROL TJM AIRTEC SNORKEL

Snorkels are commonly the first accessory ever fitted to a four wheel drive. They assist with water crossings and provide hassle free air induction when immersed in dust. They also have other key features:

- › The TJM Airtec intake design separates rain or moisture from the air stream before it enters the engine
- › Engineered to supply the correct volume of air or better to the engine
- › Manufactured in Australia from high quality UV-resistant (UV20-UV24) polyethylene for maximum strength and rigidity. All TJM Airtec snorkels incorporate stainless steel hardware
- › Utilises Australian plastic materials containing a combination of special additives and strong bonding processes. The result is a product with strong physical properties and tough impact resistance
- › Colour fast using a process called colour compounding. The pigment is fused into the molten base resin before the product is even moulded ensuring an evenly saturated polymer which prevents rubbing off or bleeding
- › Designed to be aesthetically pleasing, each Airtec snorkel is designed to flow with the vehicles natural styling. They are easily the best looking snorkels on the market
- › Simple installation minimising modifications to vehicle's original components
- › Designed exclusively for TJM and supplied through the TJM Australia wide and international sales and service network

DESCRIPTION: **TJM AIRTEC SNORKEL, NISSAN Y62 PATROL**
PART NUMBER: **011SAT0113X**
