TIRED OF BATTLING TO GET TO YOUR FRIDGE?

Our inbuilt system slides are a one piece folded galvanised steel design with strong 18mm carpeted water resistant timber top.

The heavy duty 304 stainless steel tie downs are recessed into the timber top and bolted through into the steel slide below. The tie downs lift up when in use and neatly fold down when they are not, giving a nice flat floor with no cumbersome protruding parts.

The tie downs are spring loaded ensuring no rattling when not in use.

Twin runner bearings and side guide bearings are used for easier action. The slides lock in when not in use and automatically lock out when fully extended, so if you are on an incline the fridge and slide won't move.

BLACK WIDOW FS 1 AND FS 2 STAND ALONE HEAVY DUTY SLIDES NOW FEATURE OUR UNIQUE PATENTED TRAVEL LOCK

The new Travel Lock mechanism prevents any slide movement during rough travel which can cause damage to the slide runner's built in 'lock-in, lock-out' mechanism.

This will make our fridge slides virtually bullet proof.

Rated at a high 250kg capacity of evenly distributed weight, they still offer full extension, suiting a variety of uses. The high quality heavy duty units come with a full 1 year warranty.

Patented Travel Lock is actuated via this lever. The mechanism locks the slide preventing any movement while travelling. It is very easy to use.
