## TOYOTA PRADO 150 SERIES TJM PRO LOCKER

To be tested anywhere in the Australian outback is challenging, but to be tested under 'extreme' competition conditions would leave most 4WD drivers shaking in their boots.

Luckily the Locker has been there before; 20 years before, again and again, as we researched and continued to improve its capability.

Today the TJM Pro Locker stands alone.

- › Unique air operated piston style actuator eliminates the possibility of oil being pumped up the airline
- › Hardened thrust washers and the size of the locking ring make Pro Locker extremely strong in operation
- › Contains stronger materials and a thicker carrier compared to most standard differentials
- › Larger pinion gears are used in comparison to most standard differentials
- › No carrier modification needed other than the drilling and tapping of a bulkhead fitting port
- › Large pre-tensioned 3/8" bolts hold the Pro Locker hemisphere together
- › Robust design equals less maintenance
- › Reinforced rubber external hose extension is supplied as standard to minimize the risk of the airline being damaged by debris while driving
- › Recessed coloured L.E.D. cabin switches show clearly when TJM Pro Locker is on or off
- › Patented design that has been used and proven in the field for over 20 years

DESCRIPTION: **TJM PRO LOCKER (REAR), TOYOTA PRADO 150 SERIES**

PART NUMBER: **168PL23**

FITTING TIME: **APPROXIMATELY 4HRS**
