TOYOTA FJ CRUISER 2011+ TJM AIRTEC SNORKEL

The ONLY FJ Cruiser snorkel in the Australian market to retain the side indicator lense.

The TJM Airtec snorkel is available now for your Toyota FJ Cruiser. Because of its unique design it is the only snorkel in the Australian market that retains the FJ Cruiser side indicator lense to maintain safety.

Snorkels are commonly the first accessory ever fitted to a four wheel drive, they allow for deep water crossings and hassle free air induction when immersed in dust; they also have other key features.

- › The TJM Airtec intake design separates rain or moisture from the air stream before it enters the engine.
- › Engineered to supply the correct volume of air or better to the engine.
- › Manufactured in Australia from high quality UV-resistant (UV20-UV24) polyethylene for maximum strength and rigidity. All TJM Airtec snorkels incorporate stainless steel hardware.
- › Utilises Australian plastic materials containing a combination of special additives and strong bonding processes. The result is a product with strong physical properties and tough impact resistance.
- › Colour fast using a process called colour compounding. The pigment is fused into the molten base resin before the product is even moulded ensuring an evenly saturated polymer which prevents rubbing off or bleeding.
- › Designed to be aesthetically pleasing. Each Airtec snorkel is designed to flow with the vehicles natural styling, they are easily the best looking snorkels on the market.
- › Simple installation minimising modifications to vehicle's original components.
- › Designed exclusively for TJM and supplied through the TJM Australia wide and international sales and service network.
