ISUZU 2012 D-MAX TJM AIRTEC SNORKEL

The new TJM Airtec snorkel is available now for your Isuzu 2012 D-Max. Snorkels are commonly the first accessory ever fitted to a four wheel drive, they allow for deep water crossings and hassle free air induction when immersed in dust; they also have other key features.

- › The TJM Airtec intake design separates rain or moisture from the air stream before it enters the engine.
- › Engineered to supply the correct volume of air or better to the engine.
- › Manufactured in Australia from high quality UV-resistant (UV20-UV24) polyethylene for maximum strength and rigidity. All TJM Airtec snorkels incorporate stainless steel hardware.
- › Utilises Australian plastic materials containing a combination of special additives and strong bonding processes. The result is a product with strong physical properties and tough impact resistance.
- › Colour fast using a process called colour compounding. The pigment is fused into the molten base resin before the product is even moulded ensuring an evenly saturated polymer which prevents rubbing off or bleeding.
- › Designed to be aesthetically pleasing. Each Airtec snorkel is designed to flow with the vehicles natural styling, they are easily the best looking snorkels on the market.
- › Simple installation minimising modifications to vehicle's original components.
- › Designed exclusively for TJM and supplied through the TJM Australia wide and international sales and service network.
