## NISSAN D22 NAVARA (DIESEL) TJM UNDERBODY GUARDS

To protect the most vulnerable components underneath the vehicle TJM underbody guards are constructed from 3mm thick steel sheet and incorporates strategic folds for incredible strength. They are electro coated black for corrosion resistance of up to 500 hours. The advantages of electro coating is that it gets into all the nooks and crannies and is much more resilient to chipping when knocked around, unlike powder-coated varieties.

### Features

- › 3mm thick steel
- › Provides excellent underbody protection
- › Electro coated black for up to 500 hours of corrosion resistance
- › Press folded in strategic areas for absolute maximum strength
- › Drain access holes where necessary
