## NEW MITSUBISHI MQ TRITON TJM CANOPY

### PERFORMANCE YOU CAN RELY ON: BUILT STRONG, BUILT TO LAST.

Strength is the foundation – like your home, every TJM canopy is built on a strong foundation. The integrated base rails are fundamental to the design. Equally important are the composite materials and processes that are used to build each fibreglass canopy. This guarantees performance and longevity you can rely on.

What you really need to know: weather-tight performance is so important, nothing is left to chance. Windows are installed using a customised rubber seal with an encapsulated foam core to form an impenetrable water barrier. A rubber membrane secures the canopy to the vehicle which again creates the ultimate watertight seal.

Quality procedures: Unique water testing of all major components, backed up by a comprehensive water test for every canopy after final assembly.

Accessories need to be complementary to the overall appearance of your vehicle. All TJM canopies are designed to match the vehicle lines and style for each and every application.

### Features
