Product Information

The Aeroklas Under Rail Ute Liner shields the inner-side of a vehicle tub from damage while providing a skid-resistant surface to keep cargo safe and secure.

Made from premium grade High-Density Polyethylene (HDPE) that's both robust and flexible, the Aeroklas Under Rail Ute Liner won't chip or crack, while its capacity to withstand excessive forces makes it highly resistant to scratching.

Features

- Premium grade High Density Polyethylene construction wards off chipping or cracking from excessive forces
- Provides an exceptional level of protection for the BT-50's tub
- Light weight and durable; withstands excessive forces and is scratchproof
- UV protective agent blended in to ensure durability in Australian conditions
- Tailgate section is rubber sealed to reduce friction between the bed and the door, eliminating the potential for rust
- Innovatively designed for a perfect fit for the Mazda BT-50 2020
- Patented Aeroklas installation system; no drilling required
- Certified high quality by the Thailand Automotive Institute
