Product Information

This genuine TJM Bull Bar has been created to complement the design of the Ford Everest.

The TJM Venturer bar delivers all-star looks and real-world protection where it counts. The Venturer features a boldly angular design with tapered wings that enhances the front of this Aussie icon product while also offering supreme impact protection.

As with our other bars for the Everest, the TJM Venturer bar is put through a comprehensive design and testing process to ensure that it is ADR compliant, winch compatible and compatible with all your vehicles Safety and Technology features.

Better yet, the TJM Venturer bar is embedded with TJM bull bar DNA, meaning it features an all-steel construction, winch facilities and rated recovery points as standard and an eye-catching design that enhances the aesthetics and functionality of the Ford Everest. Add our optional top hoop to stand out in the crowd and Take the Lead with TJM.
